

Ground Spikes

High quality – Made in the UK

Our Ground Spikes are perfect for trail cameras, remote cameras, slave flashes, light beams, triggers etc. Quick and easy to position and to adjust height and direction. No need to find a nearby tree or fence post.

The E1 and E2 can be joined together to make a taller spike or added to the E5 Ground Spikes

E11 Camera adaptor
In solid brass

Spares available

E2

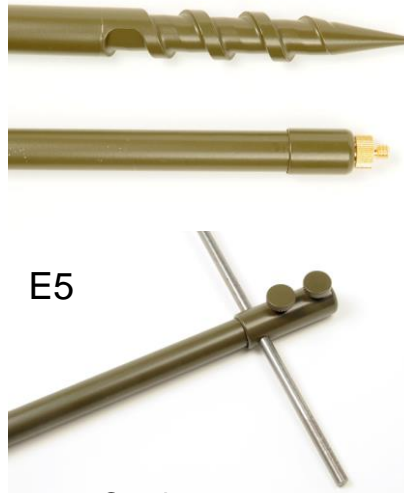

E13

E13 Mini Ball head.
Ideal for levelling trail cameras,
flashes, triggers and light beams

Our E1a, E1 and E2 Ground Spikes are ideal for low level trail cameras, flashes, triggers etc. With an extra camera adaptor code E11 they can be turned into two separate ground spikes

E5.1 Ground Spike

E5

E14 Ball head

E1a Single Ground Spike

Maintenance
Some light oil or WD40 on the screw threads
to keep the spike in good condition

Caution
Avoid using the camera to push ground spike into the ground.
Mono Pods - use our E13/14 Ball heads to avoid excessive leverage on the E11 camera adaptors or camera kit.

Our **E5.1** Ground Spikes have a double lock top & Solid screw end. 67cm (26") closed - 107cm (42") fully open. **E5.2** 94cm (37") closed - 1.6m (63") fully open. Our E5.1 & E5.2 also include a steel bar which threads through the hole in spike for screwing into hard ground. Olive green powder coated. Price includes an E11 brass camera adaptor.
