C33 Throw over hide (Bag Hide) Medium

Designed and developed by Kevin for his own wildlife photography. It will cover you, your camera, tripod and seat. Ideal for bird and wildlife photography out in the field in all conditions where you don't want to be seen by the wildlife.

QUICK AND EASY TO USE, JUST THROW IT OVER YOURSELF. NO POLES OR PEGS TO WORRY ABOUT.

One opening window with insect and scrim net. You can also put your head through the window and use the hide as a cape.

Large opening at front for lens with velcro adjustment. The throw over hide (bag hide) can also be used like an old victorian camera. Drape it over your tripod, then pull over your head and shoulders for more cover.

C33M is available in proofed and breathable poly-cotton Camouflage, Xtra, All Purpose Snow, Desert pattern (not proofed) and All Terrain Pattern. Weights are approximate.

Medium Weight	
Camouflage Pattern	1.4Kg
Realtree® Xtra Pattern	1.3Kg
Desert Pattern (not proofed)	1.3Kg
All Terrain Pattern	1.1Kg
All Purpose Snow	1.3Kg

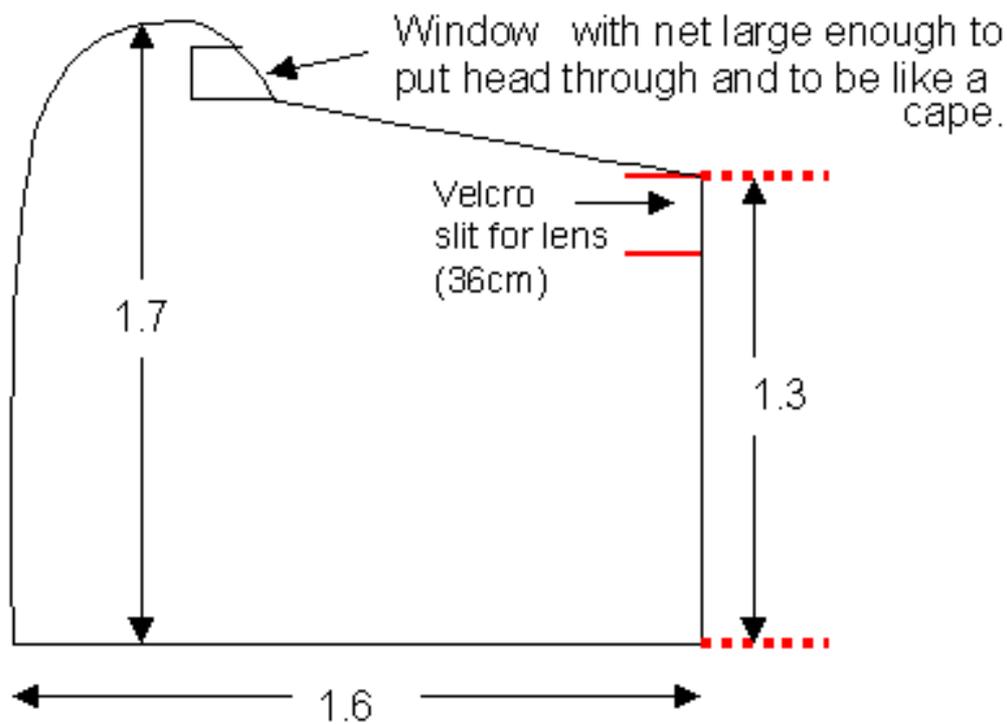

The Throw over hides (bag hides) are available in two weights. C33M medium weight and C33L lightweight. Both throw over hides (bag hides) are the same size see diagram for sizes. The C33M medium weight is made from a proofed and breathable poly-cotton material. The C33L is made from a lightweight breathable but not proofed material. If you're travelling light or in a warm country I would recommend the lightweight throw over hide (bag hide) C33L. If you want to use the throw over hide in a range of conditions including possible showers then I would recommend the C33M medium weight.

C33M medium weight throw over hides (bag hides) are available in Xtra pattern - used for most conditions such as woodland/dry grassland, heaths etc. it is the most popular pattern. The Camouflage pattern (greens and browns) is a greener pattern than Xtra so ideal for woodland or greener areas. The C33M is also available in Desert pattern (not proofed), All Purpose Snow and all terrain pattern.

Our throw over hides (bag hides) can be used in different ways as an all over hide/cover for you, your camera, chair and tripod or you can use the throw over hide (bag hide) just over the camera, tripod, head and shoulders to break up you shape and outline, just like the old Victorian camera. By having the throw over hide (bag hide) just over the camera and tripod it works well as a screen to hide your shape especially if there is other cover around you.

C33 THROW OVER HIDE (BAG HIDE) MEASUREMENTS - BOTH WEIGHTS ARE THE SAME SIZE. OUR BAGHIDE DESIGN IS SHAPED TO GIVE EXTRA ROOM AT THE BACK TO ALLOW FOR A CHAIR TO BE USED.
